PROJECTS

CRWN-CLOTHING

REACT.JS

REDUX

STYLED COMPONENTS

FIREBASE

A demo site made to explore where you can search the latest in fashion clothes as well as access multiple e-commerce functionalities such as creating accounts, shopping carts, and proceed to payments with integration via Stripe.

BATTLESHIP

REACT.JS

SASS

This is the traditional Battleship game. Users can place their ships either manually or at random locations and battle against the computer AI. When the game is finished they can see the statistics of the battle.

WEATHER-CHECK

HTML5

CSS3

JAVASCRIPT

Allows users to enter a city name, or provide their location and receive the current weather Data. This can be done using the OpenWeatherMap API and the Geolocation API.

MEMORY-GAME

REACT.JS

CSS

Users are presented with multiple images from The Breaking Bad API and the images get shuffled every time they are clicked. The main objective is to see how many images users can click without clicking the same one twice.

SKILLS

- HTML5
